NEW LIMELIGHT IN THE TAITA TAVETA COUNTY

BACKGROUND

Access to financial facilities was a nightmare for majority of the members of local community especially for the people in the informal sector. Conventional financing conditions required by the banks and other financial institutions were out of reach for members of the local community. Financial institutions tend to be capitalistic and shy from social banking, especially where our members are more of subsistence in nature. An institution that would invest in transforming even the culture was the way out for the community, an institution for the people, by the people.

VISION

"A robust financial institution transforming members lives through sustainable growth".

VALUES

Zoghori Sacco is built on the core ideology of Accountability, Commitment, Honesty Integrity, Innovation, Efficiency Transparency and Innovation.

"NURTURING A SAVING CULTURE IS OUR MAIN AGENDA"

MISSION

A leading financial institution in nurturing a saving culture for prosperity, provision of credit, diversification of products and services, through innovation, education and prudent management systems so as to transform members lives.
